

Form No. 244b) Transmitted to O/DD/S from Exec Secy of Incentive Awards
1 March 1955) Committee 26 Mar 56 for comments.

4/19/56

I have discussed suggestion #941 with Mr. Lloyd, and we have been unable to identify administrative determinations which would appear to fit into the proposal.

It is our feeling that the Opinions of the General Counsel which are now being disseminated probably fill the gap, the appreciation of which prompted the suggestion.

Perhaps the problem referred to in paragraph 4 of the suggestion results from lack of proper supervision on correspondence, rather than from a lack of guidance in this area. It is hard to believe that with all the staffing a dispatch originating with a support component receives before it can be released, problems of this type could arise. One could speculate that perhaps problems of this nature which came to the attention of the originator of suggestion #941 resulted from inexperienced operating personnel trying to supply answers on which they should have sought advice from those in a better position to know. This problem will never be solved by additional publication.
